

NATIONAL UNIVERSITY OF MODERN LANGUAGES

Human Computer Interaction lab Report – 3

NAME: Abdul Rafay

ROLL NO: FL23791

PROGRAM: BSSE (5th Semester)

COURSE: HUMAN COMPUTER INTERACTION

SUBMITTED TO: Sir Khateeb khan

DATE: 30 Sep 2025

DAY: Tuesday

LAB TASK 1: Evaluate a Web Form

```
<D index.html X
</> index.html > ...
1  <!DOCTYPE html>
2  <html>
3  <head>
4    <style>
5      body { font-family: Arial; padding: 30px; }
6      input, textarea, select { display: block; width: 300px; margin-bottom: 10px; padding: 8px; }
7      label { display: block; margin-top: 10px; }
8    </style>
9  </head>
10 <body>
11   <h2>Contact Us</h2>
12
13   <label>Name:</label>
14   <input type="text">
15
16   <label>Email:</label>
17   <input type="email">
18
19   <label>Subject:</label>
20   <input type="text">
21
22   <label>Message:</label>
23   <textarea rows="5"></textarea>
24
25   <label>Department:</label>
26   <select>
27     <option>Support</option>
28     <option>Sales</option>
29     <option>General Inquiry</option>
30   </select>
31   <button>Submit</button>
32 </body>
33 </html>
34
```

Screen Complexity Calculation (Original Form)

UI Element	Count	Weight	Total
Heading (h2)	1	1.5	1.5
Labels	5	1	5
Text Inputs	2	2	4
Email Input	1	2	2

UI Element	Count	Weight	Total
Textarea (Message)	1	2	2
Dropdown	1	3	3
Button	1	2	2
Total SCS	19.5		

Screen Complexity = 19.5

LAB TASK 2: Redesign Page to Reduce Complexity

Strategies:

- Use grouped fields with labels inside inputs.
- Add icons inside inputs for intuitive hints.
- Replace dropdowns with radio buttons (if few options).
- Use collapsible sections if many fields

Submit

LAB TASK 4: Calculate and analyse the screen complexity of images given.

LAB TASK 5: write html code to Visually Redesign.

Task 6: Evaluate a Web Form

Original Form Elements

UI Element	Count	Details
Heading (h2)	1	"Contact Us"
Labels	4	Name, Email, Phone, Message
Text Input Fields	3	Name, Email, Phone
Textarea	1	Message box
Button	1	Submit button

Grouping

- Group 1: **Personal Info** (Name, Email, Phone)
- Group 2: **Message Section** (Message box)

- Group 3: **Submit Action** (Button)

Screen Complexity Calculation

Type	Count	Examples
Graphical Elements (A)	5	3 input boxes, 1 textarea, 1 button box
Alphanumeric (B)	6	Heading, 4 labels, button text

$$SC = A + B = 5 + 6 = 11$$

Reduced Complexity (After Grouping & Redesign)

UI Element	Count	Details
Heading (h2)	1	"Contact Us"
Labels (Grouped)	3	Personal Info, Message, Submit
Input Fields	3	Name, Email, Phone
Textarea	1	Message box
Button	1	Submit

- **Graphical Elements (A)** = 5 (same as before)
- **Alphanumeric Elements (B)** = 5 (reduced, because labels are grouped)

$$SC = A + B = 5 + 5 = 10$$

Task 7: Use Html to Visually Redesign

Recreate the original and redesigned layout.

Show how grouping reduces visual load
