

NATIONAL UNIVERSITY OF MODERN LANGUAGES

Web Engineering Assignment NO 2

NAME: M Abdul Rafay (FL23791)

Ali Atif (FL23824)

Zohaib Ijaz (FL23811)

Nazish Khan (FL23843)

ROLL NO: FL23791

PROGRAM: BSSE (5th Semester)

COURSE: Web Engineering

SUBMITTED TO: Mam Faryal

DATE: 30 Nov 2025

DAY: Sunday

Assignment No 2

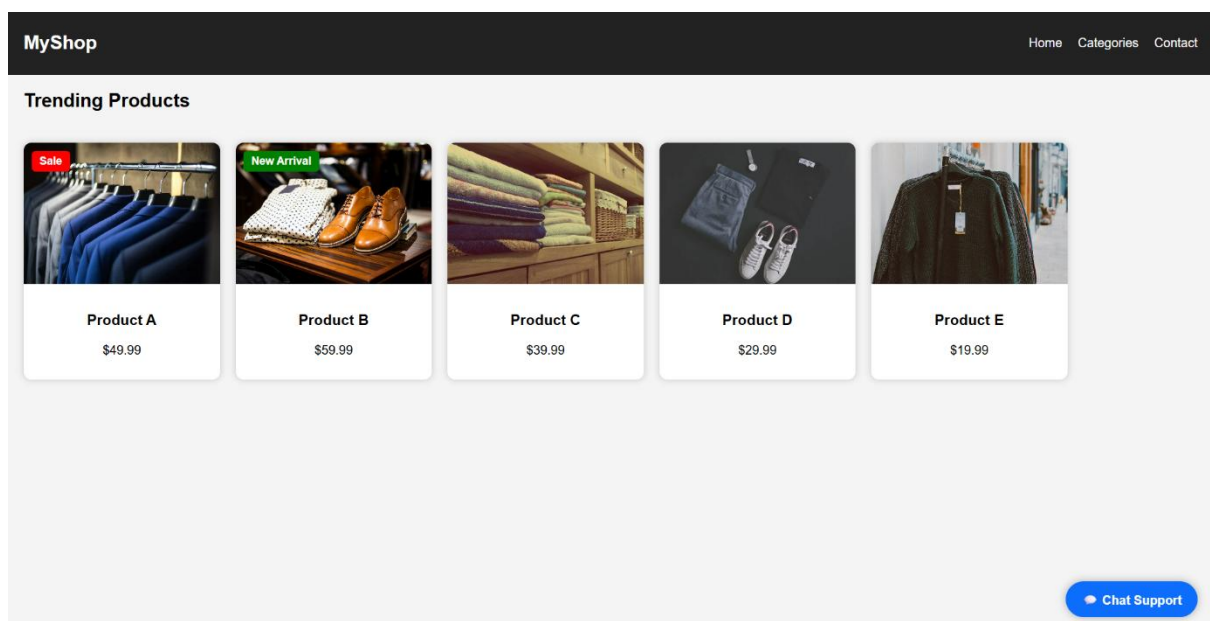

Scenario:

A leading online retail company has approached you to develop an interactive e-commerce website that is both visually appealing and user-friendly. Your primary objective is to implement CSS positioning techniques to create a well-structured and responsive layout. Additionally, the company wants a scrollable product gallery, allowing customers to browse multiple items effortlessly.

Technical Requirements: To complete this project successfully, you need to apply CSS positioning principles to meet the following implementation goals:

- **Sticky Header:** Keep the navigation bar fixed at the top while scrolling.
- **Absolute Positioned Product Labels:** Overlay “Sale” or “New Arrival” badges on product images.
- **Fixed Chat Support Button:** Ensure a floating customer support button stays visible in the viewport.
- **Relative Positioning for Product Cards:** Use relative positioning for precise element placement within product containers.
- **Drop-down Menu for Categories:** Create a dynamic menu that appears when users hover over a category section.
- **Scrollable Content:** Design a scrollable product gallery to enhance browsing experience.

Output :

Code:

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <title>E-Commerce Layout</title>
