Lab Report 1 – Setup preparation and Enviroment setup for flutter

Objective

The objective of this lab was to install and configure the necessary tools required for Flutter application development. These tools include Visual Studio Code (VS Code), Dart SDK, and Flutter SDK.

Introduction

Flutter is an open-source UI software development toolkit used to build cross-platform applications for Android, iOS, Web, and Desktop. It uses the Dart programming language.

In this lab, we prepared our system for Flutter development by installing:

- Visual Studio Code
- Dart
- Flutter

These tools are essential for building and running Flutter applications.
